Where Agility Achieves Quality

We are an IT consulting company focused on solving software delivery challenges for our clients. We are committed to delivering high quality applications using simple procedures, solid tools, and a smart team.

Agile Transformation Advisory

- Champion the Agile mindset and principles for teams and management for the organization
- Immerse the team in SCRUM methodologies and toolsets, adhere to the Agile process
- Identify and evangelize Agile and DevOps best practices by partnering with Production and Development leaders
- Institute a framework for coaching, mentoring, and education for continued skills development among agile team members

Staff Augmentation, Hiring and Recruiting

- Identify and recruit test talent at all levels and oversee onboarding and integration of new team members
- Streamline QA practices to allow for effective use of both internal and external QA resources to support scale
- Coordinate and direct off-site Quality Assurance agents and ensure efficient and thorough testing and reporting
- Emphasis on hiring and nurturing great talent - contractors onshore and cost-efficient offshore
